Subject: Settlement Plan for Yogesh Rawat

To whom it may concern,

I, Yogesh Rawat am writing this letter to provide details about my settlement plan in Ontario, Canada.

I moved to Canada in 2014 to enroll in my higher studies. I completed my masters in applied computer science from Concordia University, Montreal in 2016. After that I moved to Toronto to start my career in Information technology (IT). As you can see from my application, I worked as an IT consultant (skill 'a' of the national occupational classification 2171) in FDM Group Canada from December 2016 till March 2019. I recently joined (March, 2019) Royal Bank of Canada as full time employee in software development position. I have more than 5 years of work experience in IT including 2 years here in Toronto, Ontario.

I am currently living in the Etobicoke, Toronto along with 2 housemates. My plan is to rent one bedroom apartment near Toronto city once my wife joins me here. As classified in Canadian experience class, I have adequate funds to support myself and my wife for our daily needs. I am attaching my pay stubs from past few months with this application. Along with the government health insurance (OHIP), I also have medical insurance provided by RBC which can be extended to my spouse once she joins me here.

My spouse who wishes to join me here in Toronto has done her higher education in masters of computer science from India and currently working with Air India Express limited which is a government firm in India. Once she joins me here in Canada, she would pursue her studies in the field of IT so that she may get a job in Ever-growing IT sector in Toronto. She is a strong independent woman who will be supporting her finances while pursuing her studies by taking up some suitable part time job.

Our long term plan is to settle in Toronto as it is a financial IT hub of Canada with great job prospects to grow our careers. We will start saving money so that we can buy a house in near future and make it a home for us at a suitable neighbourhood in Toronto and also other necessary things according to the future needs.

It would be an honour and privilege to settle in Ontario, Canada because it's a diverse, culturally rich, safe, and scenic and a beautiful province to live in. It's a province brimming with growth and opportunities making it a place anyone would love to live a quality family life.

Regards,
Yogesh
